MONTHLY DIGEST OF STATISTICS

No. 253

JANUARY 1967

This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

2. The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

3. The figures in the *Digest* are mainly totals for calendar months or monthly averages.

4. Some of the figures included in this *Digest* are provisional only and may be revised in later issues.

Definitions

5. A *Supplement of Definitions and Explanatory Notes*, published with this issue, gives detailed definitions of all the terms and units used in the *Digest*.

6. The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Gallon = imperial gallon.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are normally defined in detail in the *Supplement* to the *Digest*. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

7. *Symbols.* The following symbols are used throughout:

.. not available.

— nil or less than half the final digit shown.

* average (or total) of five weeks.

8. *Change of basis.* A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

9. *Rounding of figures.* In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Changes in content

10. *Table 43. Tobacco.* This new table gives additional details of quantities of tobacco on which duty has been paid. The figures continue the series previously published in the *Overseas Trade Accounts*.

Table 44. Alcoholic drinks. This new table includes additional series on home consumption of wine and spirits. The figures were previously published in the *Overseas Trade Accounts*.

Table 53. Production of gas. Figures for Northern Ireland have now been included and the table relates to production of gas in the United Kingdom.

Table 54. Generation of electricity for public supply. Figures for Northern Ireland have now been included and the table relates to electricity generated for public supply in the United Kingdom.

Table 66. Other miscellaneous products. This table contains new series showing the quantities of home produced and imported matches on which Excise duty has been paid.

Table 149. London clearing banks. This table now includes seasonally adjusted estimates of net deposits and advances and other accounts.

- (1) Rent, rates, water charges and expenditure by occupiers on repairs, maintenance and improvements.
 (2) This series is subject to a wide margin of error because of the difficulty of separating business from personal expenditure. It is shown separately because quarterly variations have such an important influence on changes in the total of consumers' expenditure and on personal saving.

(1) Figures of total working population, total in civil employment, employers and self-employed and total employees in employment, have been obtained by the method described on pages 207-214 of the May 1966 issue of the *Ministry of Labour Gazette*.

(2) The figures for June 1964 (a) and the corresponding figures for earlier months are not strictly comparable with those for June 1964 (b) and later months which are on the revised basis of calculation (see pages 110-112 of the March 1966 issue of the *Ministry of Labour Gazette*).

(3) Figures after June 1965 for industry groups and the totals for the index of production industries and manufacturing industries are provisional and may be revised after the count of National Insurance cards at mid-1966.

(4) Owing to re-classification at June 1964, figures for earlier years are not strictly comparable. See page 59 of the February 1965 issue of the *Ministry of Labour Gazette*.

(¹) Stoppages involving fewer than 10 workpeople or lasting less than one day have been omitted except any in which the total number of working days lost exceeded 100.

(²) From 1960 the analysis by industries is based on the revised *Standard Industrial Classification, 1958*.

(³) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(⁴) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(1) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month. (2) Including prescribed industrial disease.

(3) Yearly figures are averages of twelve monthly figures. Monthly figures up to January 1966 relate to the third Tuesday of the month; later figures relate to the first Tuesday and are estimated by a new method following changes in the medical certification arrangements.

(4) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.

(5) Yearly figures are averages of quarterly figures. Quarterly figures relate to first Monday in February, May and November and last Monday in July.

(6) Including a diminishing number of widows with pensions of 30s. a week derived from the old Contributory Pensions Acts. About 76,000 such pensions were being paid in June 1965.

(7) Before 5 August 1957 widow's pension was converted to retirement pension at age 60; since that date widow's pension continues to age 65 or date of retirement if earlier. (8) The yearly figures relate to the end of January in the following year up to 1963, and to the end of December from 1964.

(9) Including the elder or eldest child for whom no allowance is payable.

* Average of five weeks.

(1) Some of the allowances provide for the requirements of a household with more than one pensioner.

(2) Before March 1961, the figures for allowances in supplementation of widows' benefit relate only to widows aged under 60, older widows being included with the retirement pensioners. The figure for September 1966 includes 47,000 recipients of widows' benefit, aged over 60.

(3) Since 1 September 1966, the issue of an 'order-to-pay' at the Employment Exchange has been based on a persons' overall requirements thus eliminating the need to confirm whether or not Unemployment Benefit is in payment. It is, therefore, no longer possible to distinguish persons whose allowances supplement Unemployment Benefit and all persons registering as unemployed are now included with Other allowances.

(4) Pension age means 65 years for men and 60 years for women.

(5) Some of the supplementary pensions provide for the requirements of a household with more than one pensioner.

(6) Includes a small number of persons over pension age.

(1) Excluding agricultural holdings of one acre or less in extent in Great Britain. In Northern Ireland excluding holdings of less than one acre.

(2) Gross production figures are shown for England and Wales and Northern Ireland and harvested production figures for Scotland.

(3) Weight in pod. (4) Shelled weight. (5) England and Wales only.

(6) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed; the production of hay in Scotland is calculated from the area cut for hay only and does not include grass mown for silage or drying.

(7) Clover and rotation grasses. (8) Including hay from permanent grass in Scotland.

(9) Including the total area of deer forest land in Scotland.

(¹) This index provides a general measure of monthly changes in total industrial production. The unadjusted index allows for variations in the length of calendar months so that it gives the average weekly rate of production in each month. The seasonally adjusted index allows for holidays and regularly recurring seasonal movements.

As some of the figures on which the index is based are available only with considerable delay, the index numbers for the last few months are always liable to be revised. Industries are grouped according to the *Standard Industrial Classification, 1958*.

(²) For an index of construction (new work only) for Great Britain, see Table 108.

⁽¹⁾ Stocks held in Northern Ireland are excluded.

⁽²⁾ Including shipments to Northern Ireland and the Channel Islands.

⁽³⁾ Figures before 1963 included coal for foreign bunkering.

⁽⁴⁾ From July 1963, the opencast figures include the production of certain licensed sites previously included in the deep mined figures.

⁽¹⁾ Mines operated by the National Coal Board which account for about 99 per cent. of the total output. Changes in the basis of the recorded figures have occurred from time to time making comparisons difficult. The figures given in this table have therefore been adjusted where necessary to conform throughout to the current definitions given in the *Supplement of Definitions and Explanatory Notes*.

⁽²⁾ From April 1966, attendances at training and other non-operational activities are excluded.

(¹) Excluding coke breeze.

(²) Excluding coke used for heating retorts at gas works.

(³) Including shipments to Northern Ireland.

(⁴) Figures relate to actual shipments made in each period and owing to the time lag between the date of shipment and the notification to H.M. Customs they differ from the figures published in the *Trade Accounts*.

(¹) Excluding quantities used for production of steam for sale. In 1966, 263,000 tons of coal and 14,000 tons of oil were used for that purpose.

(²) Including generation by oil engine, refuse destructor, and waste heat.

(³) Including purchases from industrial producers whose generation is shown in Table 55, and net imports from France.

(⁴) Annual figures relate to the maximum load occurring near the end of the year or early in the following year.

⁽¹⁾ Before 1963 figures for paint and varnish relate to sales by manufacturers employing more than 10 persons in 1954, but from 1963 to sales by manufacturers employing 25 or more persons at the beginning of that year.

⁽²⁾ From January 1963 including clear solutions and pigmented cellulose paints.

⁽³⁾ From January 1963 the figures relate to spirit-based varnishes, lacquers and stains only.

(1) The iron content of home produced iron ore is about 27 per cent. and of imported iron ore about 59 per cent.

(2) Excluding consumption of refined and cylinder iron made otherwise than in blast furnaces.

(3) At steel works, steel foundries and blast furnaces.

(4) At steel works and steel foundries.

(5) Ingots, metal for continuously cast blooms, billets and slabs and metal for castings.

(6) Stocks at producers' works of alloy and non-alloy ingots, semi-finished and finished steel in terms of ingot equivalent.

(7) Including imports (and material for manufacture of drop forgings) but excluding deliveries of all materials for intra-industry conversion.

(¹) Wool, hosiery (and other knitted goods), made-up clothing and the spinning, weaving and merchant converting sections of the cotton and man-made fibre industries. (²) The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment. (³) These indices have been adjusted to allow for differences in the lengths of calendar months but not for holidays or for other seasonal variations. (⁴) From January 1965 the figures relate to an enlarged panel of contributors.

(1) Measured in thousand piled cubic fathoms. 1 piled cubic fathom = 1.8 tons (air dry weight).

(2) Including home-grown pulpwood, wood waste, chippings and rejected pitprops.

(3) Before June 1962, figures relate only to straw.

(4) Including woodpulp for cellulose wadding.

(5) For the manufacture of rayon and transparent cellulose film.

(6) 53 week period (except for woodpulp).

(7) 53 week period.

* Average of five weeks.

⁽¹⁾ The figures for new orders were collected on a new basis in 1964 and adjustments have been made to some of the figures to make the series continuous and bring them into line with output figures.

⁽²⁾ These figures relate to work included in the preceding columns which is to be done without a firm order.

⁽³⁾ Including garages and shops.

⁽⁴⁾ Including gas, electricity, coal-mining, railways and air transport.

⁽¹⁾ The figures relate to schemes mainly over 5,000 sq. ft. The industrial coverage of approvals was changed in 1959/60 and the definition of industrial floor space changed in some regions in 1960 and 1961. The impact of these changes on completions cannot be related to particular years. ⁽²⁾ For all projects (new buildings, extensions to existing premises and buildings converted to industrial use) for which industrial development certificates were issued. ⁽³⁾ The area of industrial building has, since mid-August 1966, been extended to include all ancillary space for storage, canteens, etc. It is estimated that on the old basis the total area approved in the third quarter in Great Britain would have been about 1.2 million square feet less than that given here. ⁽⁴⁾ For manufacturing industry only (new buildings and extensions to existing premises).

(¹) Excluding building which is wholly financed from private sources. (²) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings 'Primary and secondary' and 'Special schools'. (³) Figures for England and Wales include the value of projects for which specific approval is not required. (⁴) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (⁵) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (⁶) This figure takes account of the value of Colleges of Advanced Technology projects transferred to the University Grants Committee on 1 April 1965. (⁷) The Scottish figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction, except those for the period from January 1954 to December 1959 which refer to tenders accepted for approved projects. (⁸) The Scottish figures of 'Under construction' and 'Completions' are based on the tender costs, but from January 1954 to December 1959 the figures of 'Completions' are adjusted in respect of any difference between the tender and final costs as the latter become known. The 'Under construction' and 'Completions' figures exclude the value of approved school projects which in 1965 amounted to £849,000 and £74,000 respectively.

(1) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(2) Including new schools brought into partial use before completion.

(3) Extensions, alterations, remodelling and war damage repairs.

(¹) The railway figures up to December 1962 are derived from statistics compiled by the British Transport Commission and from January 1963 from statistics compiled by the British Railways Board. The annual figures for road transport are estimated from periodic sample enquiries, traffic count data, trends in the goods vehicle population and changes in industrial output. The monthly road transport figures are estimated from traffic count data.

(1) The four-weekly averages for each year are computed from calendar year totals.

(2) The reduced fares category includes statutory day returns in the London area. From 29 January 1966 full fares and reduced fares have been combined for London Transport railways. Similarly, the annual figure for 1965 has been combined, with an appropriate revision for 1964.

(3) Season ticket journeys are calculated on the basis of 600 journeys per annum for London Transport, and before 1962 for British Railways. From 1962 the basis used for British Railways is 540 journeys per annum.

⁽¹⁾ The four-weekly averages for each year are computed from calendar year totals.

⁽²⁾ Up to and including 1962 the figures are based on miles actually hauled and include free-hauled traffic except that hauled by departmental trains. From the beginning of 1963 they are based on miles charged for and exclude all free-hauled traffic.

⁽¹⁾ Excluding movement by land across the frontier between the Irish Republic and Northern Ireland, passengers travelling between the Channel Islands and Great Britain, passengers carried in aircraft chartered by British government departments and, as far as possible, passengers travelling by sea on pleasure cruises and day trips, and H.M. and other Armed Forces travelling in the course of their duties. Including movement to and from the privately operated airports of Southend and Ferryfield.

⁽²⁾ Passengers to and from North Africa and Middle East countries have been attributed to the European continent and Mediterranean Sea area from 1960 onwards in the case of air traffic and from 1961 onwards in the case of sea traffic.

(1) The yearly totals include revisions which cannot be allocated to particular monthly periods. The monthly periods end on the last Saturday of the month except the quarter months which end on the last day of the month. (2) The sum of the twelve monthly receipts under certain headings is slightly greater than the total shown for the financial year. This is because the monthly figures include duties ultimately payable to the Isle of Man and adjustments for these are made only at the end of the financial year. (3) Including receipts from the 10 per cent. regulator on most Customs and Excise duties and on purchase tax, operative (i) from 26 July 1961 to 9 April 1962 and (ii) currently, from 21 July 1966. (4) Including receipts from capital gains tax from June 1966, and corporation tax from September 1966. (5) Including excess profits levy. (6) Land tax, mineral rights duties, excess profits duty, corporation profits tax and special contribution. (7) Including receipts from the temporary charge on imports from October 1964 less export rebates. (8) Provisional.

(1) Total deposits less (i) balances with, and cheques in course of collection on, other banks in the United Kingdom and the Republic of Ireland and (ii) items in transit between offices of the same bank.

(2) Comprising (i) Coin, notes and balances with Bank of England, etc. (excluding special deposits); (ii) Money at call and short notice; (iii) Bills discounted. From February 1961, Liquid assets include, and Advances exclude, re-financeable export credits. In 1961, certain assets were re-classified and approximately £40 million was transferred to Liquid assets from Advances.

(3) Excluding items in transit. See also footnote (2).

(4) Figures supplied by the Bank of England and rounded to the nearest £5 million.

(5) After 31 March 1966 the figures exclude the Irish business of the National Bank transferred to the new National Bank of Ireland.

(1) Average of working days, excluding accrued interest and ignoring income tax. In calculating the yields on securities with more than one maturity date, redemption is assumed at the last date when the price is below par and at the earliest date when the price is above par.

(2) Averages of daily figures calculated from middle market closing prices.

(3) Representative securities, changed from time to time:

Short dated (about 4 years), 4½% Conversion stock 1964 in 1961; 5½% Exchequer stock 1966 in 1962; 5% Exchequer stock 1967 in 1963 and 1964; 3½% Conversion stock 1969 from January 1965.

Medium dated (about 8-12 years), 5% Conversion stock 1971 in 1961 to 1963; 5½% Conversion stock 1974 in 1964 and 1965; 5% Exchequer stock 1976-78 from January 1966.

Long dated (about 18-25 years), 3½% Treasury stock 1979-81 in 1961 to 1963; 3% British Transport stock 1978-88 in 1964 and 1965; 5% Treasury stock 1986-89 from January 1966.

(4) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

(1) This index is compiled from the results of a monthly enquiry into the earnings of weekly-paid and monthly-paid employees. This enquiry was fully described in the *Ministry of Labour Gazette* for April 1963, with supplementary details in the March 1964 issue.

(2) The enquiry covers about 8,000 firms employing approximately 7 million persons in manufacturing, mining and quarrying, construction, gas, electricity and water supply, some miscellaneous services and some branches of the transport industry (London Transport was included from August 1963). In addition figures for Agriculture are supplied by the Ministry of Agriculture, Fisheries and Food, and the Department of Agriculture and Fisheries for Scotland.

(3) To convert to a weekly basis, earnings of employees paid monthly have been multiplied by 12 and divided by 52.

(4) Figures relate to the last pay-week in the month.

(5) Figures relate to calendar months.

Note: Fluctuations from month to month in the indices may be due to the payment of large annual or half-yearly bonuses, or to seasonal changes in average hours worked; e.g. variations due to the payment of Christmas and 'end-of-year' bonuses are particularly noticeable in the December figures for employees paid monthly.

(¹) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1964, published in the *Ministry of Labour Gazette* for February 1965.

(²) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 162 which cover all industries.

(1) The figures relate to changes in basic full-time weekly rates of wages and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are, in the main, those arranged by organisations of employers and workpeople or by statutory wages councils or boards. It is estimated that 14 million workers are covered by these statistics. In general, changes arranged by individual employers are excluded.

(2) The monthly totals in the columns headed 'Increase' and 'Decrease' relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed 'Net increase' is therefore the overall net increase for the year.

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

(1) The weighting of the monthly index is based on the pattern of trade in 1961. The method of calculating the import and export unit value index was explained in the *Board of Trade Journal* for 13 September 1963.

(2) The index numbers for years before 1960 which were based on 1952 = 100 have been linked to the new series 1960 = 100 to give an approximate comparison.

(3) Export unit value index as a percentage of the import unit value index.

⁽¹⁾ The index of retail prices replaced the Interim index from January 1956. A new set of weights was introduced, based on ascertained consumption in 1953-54, valued at January 1956 prices. Commencing in January 1962, the weights have been revised each January on the basis of ascertained consumption in the three years ended in the previous June, valued at prices obtaining at the date of revision.

⁽¹⁾ Based on manufacturers' list prices.

⁽²⁾ The market-price series are based on prices before the addition of subsidies paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

⁽³⁾ The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies paid to producers; those for milk and eggs on prices paid to producers by the marketing boards for these commodities; and that for potatoes on producer prices, sometimes 'supported' by the Potato Marketing Board.

⁽⁴⁾ Figures to June 1966 have been adjusted to final deficiency payments.

⁽⁵⁾ Maincrop potatoes only.

⁽⁶⁾ Based on guaranteed minimum prices to producers at packing stations.

⁽⁷⁾ Based on net prices to farmers after deduction of subsidy.

CENTRAL STATISTICAL OFFICE

ANNUAL ABSTRACT OF STATISTICS

1966

The ANNUAL ABSTRACT OF STATISTICS contains a selection of the most important statistics covering the economic, industrial and social life of the United Kingdom. The latest edition, published in December 1966, gives annual figures so far as they are available for the years 1955 to 1965, and in some tables also the early months of 1966.

The Abstract contains over 380 tables covering the following subjects:

| | | |
|-------------------------------|----------------------------|----------------------------------|
| Agriculture and food | Fisheries | Passenger movement |
| Balance of payments | Fuel and power | Population |
| Banking | Housing | Prices |
| Construction | Industrial production | Retail trade |
| Climate | Insurance | Transport: Road, rail and air |
| Crime | Labour | Shipping |
| Education | Materials and manufactures | Social services |
| External trade | Migration | Vital statistics |
| Finance: Home and overseas | National Health Service | Wages and earnings |
| | National income | |

Standard Regions and Conurbations are defined in Appendix I. Appendix II gives the 152 Minimum List Headings grouped into the 24 Orders of the Standard Industrial Classification (1958).

The Abstract also contains a useful current Index of Sources which lists the titles of official publications or other sources containing statistics allied to those in the tables.

The Abstract is of special and immediate value to industrialists, journalists and economists, besides being of great interest to the general public. In many cases the annual figures are presented in greater detail than in the MONTHLY DIGEST OF STATISTICS.
